DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 2871

4. Claims 1-24 are rejected under 35 U.S.C 102(e) as being clearly anticipated by Hinata et al., US Patent No. 6,882,390.

The above claims are clearly anticipated by Hinata et al. figure 2 and accompanying text, which discloses a an electro-optical device of Applicant's figure 2, as so claimed in the above claims.

5. Claims 17 and 24 are rejected under 35 U.S.C 102(e) as being anticipated by Sakamoto et al., US Patent No. 6,608,663.

The above claims are anticipated by Sakamoto et al. figure 6(b) and accompanying text which disclose an electrical wiring structure formed on a substrate in which a metal film (602) having a side rising in a vertical direction, an insulating film (610) covering the metal film (602) and a wiring line (603) as claimed.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later

Art Unit: 2871

invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 20 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sakamoto et al., US Patent No. 6,608,663.

Regarding claims 20 and 23, although Sakamoto et al. do not explicitly disclose a based material of aluminum or aluminum alloy or silver or silver alloy for the metal film, it would have been obvious to one having ordinary skill in the art at the time the invention was made to employ a Sakamoto et al. metal film by aluminum or aluminum alloy or silver alloy, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use in terminal connections since such aluminum or aluminum alloy or silver alloy having a lower resistance with a good electrical conductivity.

Double Patenting

9. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

10. Claims 1-24 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 7-8, 11-12 and 15-16 of U.S. Patent No. 6,882,390.

Art Unit: 2871

Although the conflicting claims are not identical, they are not patentably distinct from each other because both application and patent disclose a same electro-optic apparatus comprising mounting terminals, first wiring patterns, second wiring patterns, first inter-substrate electric connection terminals and second inter-substrate electric connection terminals as claimed.
